## IT SOLUTIONS FOR SMEs

Despite being a small business, data is still the lifeblood of your organization. Comprehensive IT security solutions are essential to prevent threats from impairing your operational efficiency and losing any competitive advantage. Every SME needs to have:

### DATA BACKUP & STORAGE with QNAP NAS

We provide an ideal backup solution, with large storage capacity and excellent file transfer speed to greatly assist businesses on efficient backup tasks. In addition to the backup, we can also have its data backed up to external storage devices, remote servers, and third party cloud backup services easily and conveniently.

This is provided using QNAP Systems cutting edge network attached storage (NAS) and network video recorder (NVR) solutions featured with ease-of-use, robust operation, large storage capacity, and trustworthy reliability. QNAP integrates technologies and designs to bring forth quality products that effectively improve business efficiency on file sharing, virtualization applications, storage management and surveillance in the business environments, as well as enrich entertainment life for home users with the offering of a fun multimedia center experience. Headquartered in Taipei, QNAP delivers its solutions to the global market with nonstop innovation and passion.

## ANTIVIRUS & INTERNET SECURITY with KASPERSKY SMALL OFFICE SECURITY

Because of increased reliance on computing and the Internet, all businesses are more vulnerable to malware and cybercrime attacks against their computers. Valuable business information, online financial transactions and sensitive data are all at risk. Smaller businesses face the same security risks as large organizations, but often don't have the time or resources to configure and manage complex IT security solutions.

Kaspersky Small Office Security IS designed for businesses running 5-25 computers, some servers and mobile devices. It works out-of-the-box and no IT skills are needed to use its powerful security tools.

# Protection while you work

**TAILOR-MADE SECURITY  
FOR SMALLER BUSINESSES.  
NO HALF MEASURES.  
NO SHORT-CUTS.  
JUST A PERFECT FIT**

Smaller businesses face many of the same security threats as large enterprises. But they don't have the same resources to deal with them.

That's why Kaspersky Lab developed **Kaspersky Small Office Security**.

Designed specifically for businesses with 5-25 users, it's easy to install, even easier to manage and provides the world's most-tested, most-awarded security to **PCs, file servers, laptops and mobile devices**, while protecting your business from online attacks, financial fraud, ransomware and data loss.

More than 30 per cent of security breaches occur at companies with less than 100 employees. And 44 per cent of small-and-medium-sized businesses have been attacked by cybercriminals\*.

With **Kaspersky Small Office Security**, you can be sure that when the cybercriminals come, it'll be business as usual for you.

Kaspersky Small Office Security isn't a pared down version of an enterprise product, squashed to fit a smaller environment. It's tailor-made security designed specifically for smaller businesses, combining award-winning anti-malware with additional technologies specifically for smaller businesses:

#### EASY DOES IT

Kaspersky Small Office Security is so easy to use, **anyone can do it**. You get out-of-box simplicity with extended functionality and control. Our **web-based console** means you can manage and monitor security from anywhere you choose — including outsourcing to external specialist.

#### STAY SAFE ON THE MOVE

Protect Android smartphones and tablets with our mobile security and management technologies. Lock, wipe and locate missing devices — use secure 'containers' to protect sensitive information on employee-owned devices. Filter out spam and time-wasting junk calls while you're at it.

#### MIND YOUR MONEY

Prevent financial fraud and secure online banking. The award-winning **Safe Money** protects online banking transactions while virtual and secure keyboards prevent keyloggers from stealing your details.

#### SECURE WEB AND EMAIL ACTIVITY

Stop spyware, phishing and malicious Internet links from hijacking your business. Secure email and web activity against hidden exploits and a malware.

#### PROTECT SENSITIVE DATA AND SAY NO TO CRYPTOLOCKERS

Secure sensitive data and protect your business from data breaches, fines and lost business with **Backup and Encryption**. **Anti-cryptor** capabilities stop crypto-lockers and ransomware in their tracks. Attempts at malicious encryption trigger automatic backup and restore.

#### PROTECT YOUR PASSWORDS

Securely generate, store and synch passwords for easy access from PC, Mac, Android and iOS devices. All you have to do is remember one.

#### FEEL THE SPEED

Optimized software performance and PC resource consumption give you more efficient traffic flow, faster web loading times and optimized deployments, updates and start-up time.

#### HIT THE GROUND RUNNING

Before you even launch it, Kaspersky Small Office Security can control application activity on your network, in line with your firewall settings.

#### MOST TESTED, MOST AWARDED SECURITY

No other vendor can match Kaspersky Lab's success record in independent tests. In 2015 Kaspersky Lab products participated in 94 independent tests and reviews. Our products were awarded 60 first and 77 top-three finishes.

#### PROTECTION ACROSS PLATFORMS

Kaspersky Small Office Security protects: Windows PCs, laptops and Servers; Mac laptops and desktops; Android smartphones and tablets. Password management is available for Android and iOS devices.

## NETWORK SECURITY & FIREWALL

Cyber security or IT security is information security as applied to computing devices such as computers and Smartphone's, as well as computer networks such as private and public networks, including the Internet.

Our cyber security solution based on Cyberoam delivers unified security over a single console, enabling small offices to shift from plain firewalls to comprehensive network protection with cost-effective, yet powerful security against malware, spam, Trojans, DoS, DDoS, phishing, pharming, intrusions, risky applications and harmful websites. At the same time, large organizations can implement uniform security and gain high visibility into remote and branch offices with centralized management and Layer 8 Identity-based security. In addition to these organizations can also gain secure remote access, redundant WAN connectivity and availability, data leakage protection and advanced networking features.
